

DATASHEET

KWIKRETE™ READY MIXED CONCRETE

GENERAL DESCRIPTION:

KWIKRETE™ READY MIXED CONCRETE is a construction grade Concrete Mix, designed for casting fence or wash line poles; repairs to driveways; building of pathways etc.

ADVANTAGES:

- Correctly proportioned
- Cost effective (required amount can be purchased)
- Watertight

APPLICATIONS:

- Surfaces to receive KWIKRETE™ READY MIXED CONCRETE should be free of dirt, loose debris, grease and oil for best possible bond
- If material becomes too difficult to mix, add additional water until workable.
- Curing of concrete is required only if conditions are very hot, dry or windy. In such cases, a gentle mist of water applied to the surface will prevent premature drying and improve the strength of the KWIKRETE™ READY MIXED CONCRETE.
- A Bonding Liquid can also be added for extra strength.
